

內容請分段落：

Step1. ISERROR 函數

點選 A3 儲存格→先輸入公式「=IF(MONTH(A2+1)<>MONTH(A2),"",A2+1)」→剪下公式→貼上剛剛的公式，並完成公式成

「=IF(ISERROR(A2+1),"",IF(MONTH(A2+1)<>MONTH(A2),"",A2+1))」→填滿其他儲存格→選擇「填滿但不填入格式」

The screenshot displays the Microsoft Excel interface. The formula bar at the top shows the formula: `=IF(ISERROR(A2+1),"",IF(MONTH(A2+1)<>MONTH(A2),"",A2+1))`. The worksheet contains a calendar for the year 106. The first row (row 1) lists the months from January to December. The second row (row 2) lists dates from 106.01.01 to 106.12.01. The third row (row 3) contains the formula `=IF(ISERROR(A2+1),"",IF(MONTH(A2+1)<>MONTH(A2),"",A2+1))` in cell A3. A dialog box titled "函數引數" (Function Arguments) is open, showing the IF function configuration. The Logical_test is `ISERROR(A2+1)`, Value_if_true is `""`, and Value_if_false is `IF(MONTH(A2+1)<>MONTH(A2),"",A2+1)`. The calculation result is `106.01.02(週一)`.
